

# GS-ANT-86-501

Drawing:

| Technical Data                   |                  |                                                   |
|----------------------------------|------------------|---------------------------------------------------|
| <b>5G / 4G -Antenna, SMA (m)</b> |                  |                                                   |
| <b>LTE</b>                       | Frequency Range  | 690-960 MHz<br>1710 - 3500 MHz<br>4800 - 4900 MHz |
|                                  | VSWR*            | 1 : 4.5                                           |
|                                  | Gain             | 0.5dBi / 1.3 dBi / 2.1 dBi                        |
|                                  | Power Max.       | 20 W                                              |
|                                  | Impedance        | 50 Ω                                              |
|                                  | Polarization     | Vertical                                          |
|                                  | Radiation        | Omnidirectional                                   |
| Mechanical Data                  |                  |                                                   |
|                                  | Dimensions (ØxH) | ca. Ø 7.5 - 8 mm x 78 mm                          |
|                                  | Connector        | SMA (m)                                           |
|                                  | Color            | Black                                             |
|                                  | RoHS compliant   |                                                   |
